PERSONAL STATEMENT

I'm a Data Analyst in Thomson Reuters. A generalist and technological do-it-yourself'er, I have a huge interest in data computation, visuals and programming. My formal education was at the Kiev National Economic University, where I graduated in 2010.

My interests outside of data analysis have taken me far afield, including years-long dalliances into film making and web development, both of which continue to inform my work in data management, visual formatting and overall professional life.

During my free time, I like to drink caffeine and get back to work.
